

Browsealoud

IDA has partnered with Texthelp to provide an enhanced experience for site visitors when they access our content.

We've added Browsealoud to our websites – an innovative support software that adds speech, reading, and translation to all of our websites facilitating access and participation for people with dyslexia, low literacy, English as a second language, and those with mild visual impairments.

Online content can be read aloud in multiple languages using the most natural and engaging voice to transform the user's reading experience.

Browsealoud features:

- Text-to-speech with choice of reading speeds and highlighters to enhance reading comprehension
- Translate web pages into 99 languages; speak translated text aloud in 40 languages
- On-screen text magnifier helps users with visual impairments
- MP3 generator converts text to audio files for offline listening
- Screen mask blocks on-screen clutter, letting readers focus on text being read
- Web page simplifier removes ads and other distracting content for easier reading
- Custom settings built in to suit individual user needs and preferences
